

HGKB Ruder Plakat LL Var 500

Font Format: OpenType TrueType (OpenType TTF)
Designer: Hans-Christian Pulver, Arve Baatevik/Lineto,
Anatole Couteau/Lineto

OpenType Font Variations

OpenType Font Variations allow to incorporate multiple font faces within a font family into a single font.

Variation Axes

The set of axes that make up the font's variation space are defined by an array of variation axis records.

Tag	Name	Minimum	Default	Maximum	Flags
YTUC	Uppercase Height	100.0	250.0	900.0	-
YTLC	Lowercase Height	100.0	500.0	900.0	-
YTDE	Descender Depth	100.0	100.0	900.0	-

Variation Instances

The instance records define the position within the font's variation space.

OpenType Layout Features

For details about OpenType Layout Features see the [OpenType Layout tag registry](#).

Substitution Features

Access All Alternates
This feature makes all variations of a selected character accessible.

Standard Ligatures
Replaces a sequence of glyphs with a single glyph which is preferred for typographic purposes. This feature covers the ligatures which the designer/manufacturer judges should be used in normal conditions.

Denominators
Replaces selected figures which follow a slash with denominator figures.

Superscript
Replaces lining or oldstyle figures with superior figures (primarily for footnote indication), and may replace lowercase letters with superior letters (primarily for abbreviated French titles).

Ordinals
Replaces default alphabetic glyphs with the corresponding ordinal forms for use after figures.

Localized Forms
This feature enables localized forms of glyphs to be substituted for default forms.

Stylistic Set 1 (Alternate a)
Glyphs in stylistic sets may be designed to harmonise visually, interact in particular ways, or otherwise work together.

Stylistic Set 3 (Alternate Ring)

Stylistic Set 5 (Alternate At)

Stylistic Set 7 (Alternate Copyrights)

Contextual Alternates
In specified situations, replaces default glyphs with alternate forms which provide better joining behavior.

Numerators
Replaces selected figures which precede a slash with numerator figures, and replaces the typographic slash with the fraction slash.

Fractions
Replaces figures separated by a slash with 'common' (diagonal) fractions.

Subscript
The "subs" feature may replace a default glyph with a subscript glyph.

Case-Sensitive Forms
Shifts various punctuation marks up to a position that works better with all-capital sequences or sets of lining figures; also changes oldstyle figures to lining figures.

Stylistic Alternates
Many fonts contain alternate glyph designs for a purely esthetic effect; these don't always fit into a clear category like swash or historical. This feature replaces the default forms with the stylistic alternates.

Stylistic Set 2 (Alternate r)

Stylistic Set 4 (Alternate Ampersand)

Stylistic Set 6 (Alternate Parenthesis)

Stylistic Set 20
(Multiply)

Glyph Composition / Decomposition
To minimize the number of glyph alternates, it is sometimes desired to decompose a character into two glyphs. Additionally, it may be preferable to compose two characters into a single glyph for better glyph processing. This feature permits such composition/decomposition.

Alternate Annotation Forms
Replaces default glyphs with various notational forms (e.g. glyphs placed in open or solid circles, squares, parentheses, diamonds or rounded boxes).

Positioning Features

Kerning
Adjusts amount of space between glyphs, generally to provide optically consistent spacing between glyphs.

Mark Positioning
Positions mark glyphs with respect to base glyphs.

Mark to Mark Positioning
Positions marks with respect to other marks.
Required in various non-Latin scripts like Arabic.

All alternates are accessible with OpenType layout feature capable applications. If not specified, the feature is registered for all language systems.

10	Font Description	<p>The LL Ruder Plakat fonts were designed by Hans-Christian Pulver, Arve Båtevik and Anatole Couteau at Lineto between 2018 and 2024. They are faithful digital recreations and extensions of Emil Ruder's wood type font, which he created with his students in the mid-1950s for use at the print workshop at Allgemeine Gewerbeschule Basel. The variable and Maxi versions add to the original design by extending the typeface's range beyond the original proportions, mirroring the distinctive styles popular in Switzerland's graphic design of the era. A contoured font with variable line thickness adds to the functionality of this impactful typeface which was primarily intended for large use on posters. First released by Lineto in 2022. Font engineering and mastering by Alphabet, Berlin.</p>
